Please find attached the revised Quickscore 3.0.3 for the Upper Animas Mining District/Upper Cement Creek. Your comments from the draft report have been incorporated. A hard copy is in the interoffice mail.

We charged approximately \$250 to the revision (mine and the tech editor's time). This will result in the TDD for Upper Animas Mining District being over an additional \$250 for a current total overage of \$1,284. I'm having a \$30 FedEx charge removed and the final invoice for the wetlands delineation is being processed so this number might go down. The exact figure will probably not be ready until next week.

If this revision of the QuickScore is OK then there should be no further work on this TDD. START would also need an addition of a couple of hours to process an Amendment to this TDD.

Thanks,
